

Measure Performance with Up-to-the-Minute Reporting

Custom District Assessment Tools: Pearson Benchmark™

Pearson's complementary solutions enable educators to enrich student learning through meaningful assessment data, frequent feedback, and actionable results.

For school districts across the country, Pearson Benchmark™ provides the next generation in assessment capabilities. Educators rely on Pearson Benchmark for comprehensive, customizable, web-based testing, reporting, and analytics. They can manage and maximize student achievement, taking multiple measures of student performance against standards at any time throughout the school year.

With the ability to gather student performance results collected over time, teachers and administrators can readily monitor student progress, address deficiencies, and recheck mastery—by class, course, grade level, school, or even various demographics. The result is more targeted instruction, shorter assessment cycles, and enhanced student performance.

No matter the district size, Pearson Benchmark offers the right solution at the right time, empowering educators to improve the quality and relevance of their instruction by understanding exactly where their students are academically.

continual measures.

accurate results.

Why Consider Pearson Benchmark?

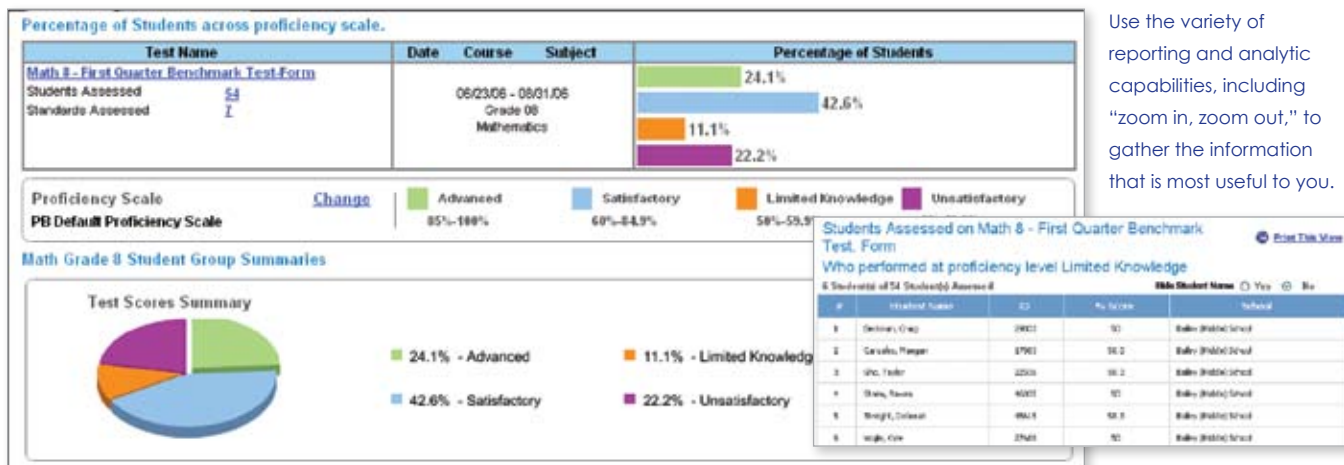

- Offers user-friendly, wizard-driven processes
- Supports secure online and offline, paper/pencil, assessment delivery
- Enables on-demand performance measurement
- Measures against state and district standards

*Mr. Thomas tailors his teaching plan for the coming week based on **up-to-the-minute** measures of his students' performance, rather than spending his time compiling test results like he did before he used Pearson Benchmark.*

Assess to Measure Achievement

Pearson Benchmark provides a secure online test environment as well as a scanning solution for paper testing. Raw test scores are available immediately following online test completion and scanned paper results. Literally overnight, Pearson Benchmark prepares a rich array of test results, including scores, item analysis, and mastery of standards, for use in online analysis and reporting.

Use the variety of reporting and analytic capabilities, including "zoom in, zoom out," to gather the information that is most useful to you.

All data—including student, teacher, and school names; locations; grades and scores; and associated information—are fictional and modeled for sample purposes only. Any form of familiarity is coincidental.

Pearson Benchmark offers a comprehensive set of assessment components and a full range of achievement-driven capabilities:

- Continuously measure student performance against state and district standards throughout the school year.
- Create, deliver, score, and report on standards-based district, school, or classroom tests—online or offline.
- Support state and district curriculum standards for all content areas, grade levels, and courses.
- Customize your view of benchmark test results with "zoom in, zoom out" functionality.
- Monitor student progress and inform instructional decisions accordingly.
- Dynamically assign tests to students by class, course, grade level, school, or demographic characteristics.
- Apply a comprehensive suite of analytics with objective, valid, and reliable evidence of student progress toward meeting district and state benchmarks and standards.
- Support prescriptive measures by addressing deficiencies and rechecking mastery.
- Empower users with advanced, easy-to-use, web-based tools and interactive wizards.

With Pearson Benchmark, educators can deliver a wide array of reporting and analytic capabilities, fulfilling No Child Left Behind (NCLB) Adequate Yearly Progress (AYP) requirements while providing a comprehensive view of progress, from student to classroom to school to district. Because assessments can be structured to report results at multiple standard tier levels, a district-level test can report on a more global level of the standards framework, while schools and classroom-level assessments might report on a more discrete level of the standards framework. District- and school-level assessments can be secured, which prevents changes to the actual assessment and restricts changes to test results.
